

Fiber Driven. People Powered.

PARTNERS IN DEVELOPMENT Conterra Networks

COMPANY PROFILE

formerly Network USA, is the primary telecommunications service provider to all of TexAmericas Center’s campuses. With Conterra Network’s commitment to the community of Bowie County and Texarkana, it has constructed 29 miles of fiber, which provided the opportunity for Conterra to begin construction of Ringed Network surrounding the three TAC campuses.

Conterra provides TAC tenants with content delivery and connectivity across a 144-strand fiber optic connect, with multiple diverse paths to the Equinix 1950 Stemmons Freeway in Dallas, TX.

that include, but are not limited to, Cloud Connect and Managed Wireless Failover, Conterra has the ability to provide hardened environments that are able to survive most service disruptions and events.

Conterra serves more than 300 education, government, enterprise and wholesale carrier customers across 22 states.

- High-Speed
- Dual Feed
- Wave
- PRI
- SIP
- Managed Wireless Failover
